Abstract

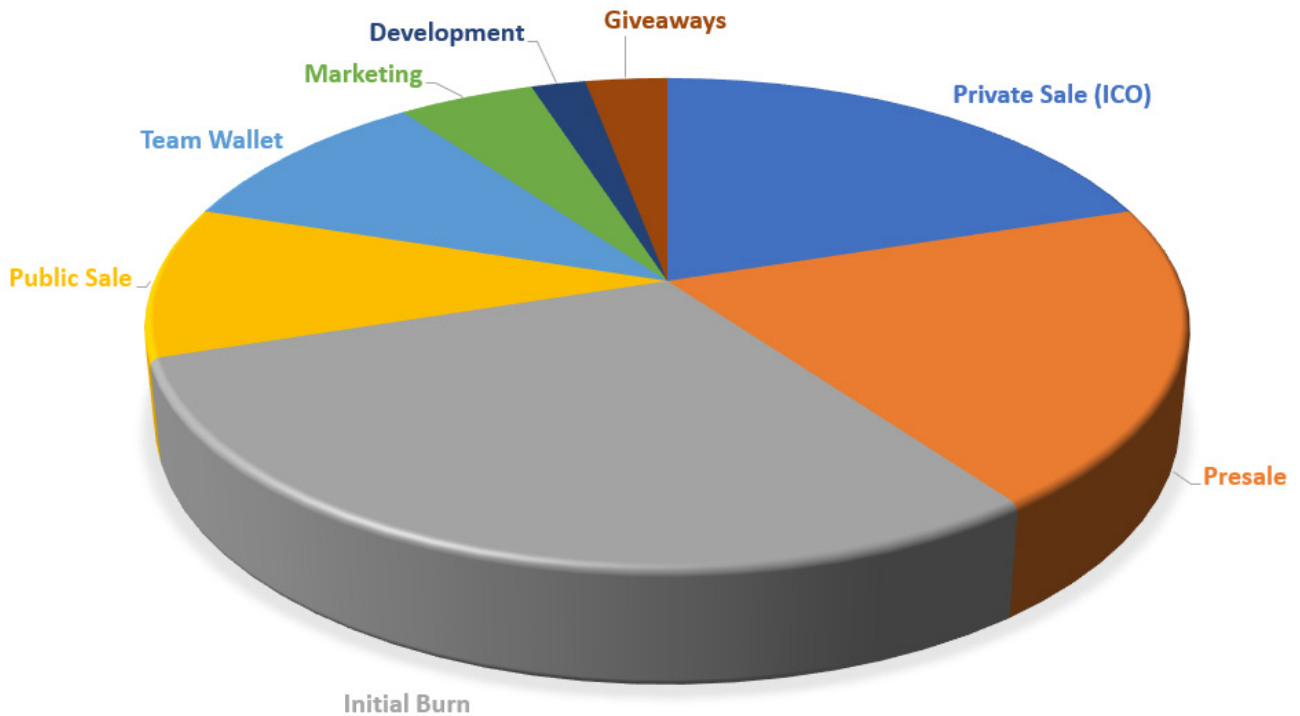

This whitepaper is a reader-friendly description of the Kai ken Inu token.

Kai ken Inu token will be the base token that will take the lead in the Kai Ecosystem. Every feature of the Kai Ecosystem will utilize this base token. Proceeding pages will give more information about the Kai Ecosystem. Kai ken aims to reward Holders greatly but will be aggressive towards dumpers and sellers. For this, a one-of-a-kind anti-dump mechanism has been put in place. The more sale is done for every transaction, the more reward the holders get proportion to their holdings. The team calls it the “Ladderized Tax” mechanism.

Every feature of the ecosystem will be built also to the Kai Mobile App that will be developed in-line with the development process of the Kai Ecosystem. As the Kai ecosystem nears its final stage, its features might be broadened or lessened depending on several factors which can be determined as the project is being advanced.

Problem

Most dog tokens remain as meme coins only, without any usage nor contribution to the community. Some were just being hyped by celebrities and prominent personalities without any real-life developments.

Our Solution

This token was developed for a sole purpose, that is to become the base token for the Kai Ecosystem. This Kai Ecosystem is unique, fun and a heart-pounding environment where users can have the chance to interact with or against other users in a fun-filled platform. Users can farm tokens, create NFTs, take care puppies and use them for dog games or just trade them in an open market.

Notable Features

- Ladderized tax mechanism. This is first ever seen and implemented here. Highly favoring holders and controls dumping.
- Fun features all in one platform
- Features exclusive to Kai Ecosystem
